PBCDF is in a scheduled outage for changeover activities to prepare for VX landmine disposal operations. This week's activities included restarting of the Deactivation Furnace System and Heated Discharge Conveyor. Wednesday, March 26, the site participated in the annual Chemical Stockpile Emergency Preparedness Program (CSEPP) training exercise. The CSEPP exercise involved participants from the on-post and off-post communities and evaluated their response capabilities in the unlikely event of a chemical weapons accident.
